

Quality Parts and Reduced Costs Through Value Engineering

- Engineering Design Assistance
- One Time Only, NRE (Non-Recurring Engineering) Fee
- Cost-Efficient
- Precision-Built
- Free Tooling Insert Storage and Maintenance for Lifetime of Part

"By asking the right design questions, Service Stampings helped us reduce our costs while maintaining part functionality and performance. We use Service Stampings as an extension of our engineering department."

*— Austin Webel
Lumitex Medical Devices, Inc.
Strongsville, OH*

ENGINEERING DESIGN ASSISTANCE

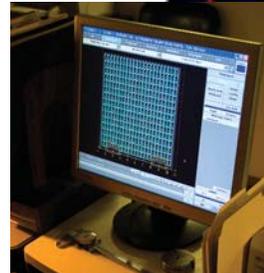

Our engineering team will assist you from the start with consultation and design assistance to make sure your parts are manufactured to your exact specifications and are produced as cost-efficiently as possible. We will also help you make informed decisions about when it's best to use stamping versus other technologies for your applications.

Our engineers will review your requirements and make recommendations regarding design feasibility, functionality, supply tolerances, cost ratios, and other important project considerations. Once a design plan is finalized, we will provide complete prototyping services (if required) allowing you to evaluate a finished part prior to committing to larger order volumes.

From design to manufacturing, Service Stampings engineers are ready to help through each step of your project.

ONE TIME ONLY, NRE (NON-RECURRING ENGINEERING) FEE

Service Stampings charges a nominal, NRE (non-recurring engineering) fee for the initial engineering, tooling, and proprietary die inserts required for producing your part. That same part can be reordered in the future as many times as you need without any additional charges being incurred.

Engineering *continued*

COST-EFFICIENT

Minimizing costs for parts and assemblies begins with the development of cost-efficient tool and die inserts. Through the use of quick-change inserts, standard dies, single-station fixtures, and know-how gained from over fifty years of experience, we can provide both the high quality you require along with a reduction of costs by as much as 85% when compared to conventional methods.

PRECISION-BUILT

With the capability of holding tight tolerances, our precision-built tooling is manufactured to make sure your parts and assemblies meet or exceed your most critical performance requirements.

FREE TOOLING AND DIE INSERT STORAGE AND MAINTENANCE FOR LIFETIME OF PART

We make re-ordering easy and cost-effective. For the lifetime of your part or assembly, Service Stampings will provide tooling and die insert storage and maintenance services *at no additional charge*. This allows you to re-order your part or assembly quickly while maximizing your savings.
